

Graduiertenkolleg

TrustSoft

Graduate School on

**Trustworthy
Software Systems**

www.trustsoft.org

The University of Oldenburg, Germany, offers from **April 1st, 2008**

12 PhD Scholarships

to applicants with excellent study results in Computer Science, Law, or closely related disciplines.

Software increasingly influences our daily life, as we depend on a raising number of technical systems controlled by software. Additionally, the ubiquity of Internet-based applications increases our dependency on the availability of those software systems. The successful deployment of software systems depends on the extent we can trust these systems. The graduate school will contribute to this comprehensive view on trusted software systems by bundling the Oldenburg computing science competences with those of computer law.

PhD scholarships will be provided at €1,365.- per month plus €103.- for non-personal costs. This is the net income; no taxes are raised on these scholarships. Surcharges are allotted based on marital status and number of children. Scholarships will be granted for up to three years.

The program is financed by the German Research Foundation (DFG) and supported by industrial corporations. For more information on entrance requirements and admission procedure please contact the chair of the graduate school (address below) and refer to

<http://trustsoft.uni-oldenburg.de/information/admission>

Applications should be submitted before December 14th, 2007 to the chair of the Graduate School (preferably earlier, but later submissions are also possible, please check the web page above). Both, hardcopy and electronic submissions are expected. PDF-Files should be sent to **hasselbring@informatik.uni-oldenburg.de**. One hardcopy should be sent to the chair of the graduate school:

Prof. Dr. Wilhelm Hasselbring
Department for Computer Science, FK-II, University of Oldenburg, D-26111 Oldenburg, Germany
